

## County Services That May Intersect With the Schools

### Family School Support Workers

- Eligibility: Family has a need that a social worker may be able to address. May vary somewhat by school.

### Children's Mental Health (CMH) Case Managers

- Eligibility: Determined by a Diagnostic Assessment completed at a mental health clinic. Psychological testing is not required, but is completed with some clients, as needed. SPED Evaluation can NOT qualify a student for CMH services.

### Child Protection Case Managers, Family Assessment Social Workers or Investigators

- Eligibility: A child protection report is accepted by the county. Typically, these social workers are not as involved with the schools regarding SPED processes as for those students with disabilities.

### CADI Waiver Case Managers (CADI = Community Access for Disability Inclusion)

- Eligibility: This service is primarily for those with a significant medical, physical or mental health need. The SPED Evaluation is a component of information used for determining eligibility, but medical records are primary.

### Developmental Disability Case Managers:

- Eligibility: See attached handout regarding eligibility. This is the only county program for which the SPED evaluation can fully qualify a student for county services. Outside of the school setting, a full psychological evaluation is required due to need for standardized scores. A Diagnostic Assessment is not sufficient.
