Introduction: Special Education within NLSEC Member District

This Parent Resource Book was developed in collaboration between the Northern Lights Special Education Cooperative and the Northern Lights Interagency Council.

The Northern Lights Special Education Cooperative (NLSEC) provides, by cooperative efforts, comprehensive special education services within member school districts for children and youth having significant learning needs due to disability or developmental delay. More information about Northern Lights Special Education Cooperative can be found by viewing our website at: [www.nlsec.org](http://www.nlsec.org)

The Northern Lights Interagency Council (NLIC) is comprised of approximately 60 individuals from 5 area counties, The NLSEC, private and school programs as well as parents, students, business and university personnel who serve needs of individuals with disabilities from birth through adulthood. The purpose of Northern Lights Interagency Council is to provide eligible children with disabilities and their families with a coordinated, multi-disciplinary, interagency, intervention services system that is family centered, community based and culturally competent.

The purpose of this Parent Resource Book is to provide parents, guardians and caregivers a comprehensive resource & directory where information regarding special education, county based services, behavioral/mental health resources, other community based resources, special education & disability advocacy, pre-school resources, information regarding assistive technology, as well as information regarding where to obtain information on child development.

Transition resources for students graduating high school are contained in the companion Secondary Transition Resource Booklet or by visiting [www.nlsec.org](http://www.nlsec.org) and clicking on Services - Secondary Transition - Secondary Transition Resource Booklet.

Overview of Special Education

Every child is unique and learns in different ways. If your child has been identified as needing special education services to support his or her learning at school, you can play a major role in shaping the services your child receives.

There are many resources to help you understand the Individualized Education Program (IEP) and the importance of your participation in developing your child's IEP Plan. PACER is one of the most recognized resource and advocacy agencies in Minnesota. Visit their website to find many resources available for parents: [www.pacer.org/parent](http://www.pacer.org/parent)

You are a required member of your child's IEP team, and your ideas must always be considered in any decisions the IEP team makes. The development of the IEP is required in the federal Individuals with Disabilities Education Improvement Act (IDEA 2004), its regulations (known as 34 Code of Federal Regulations [CFR] Parts 300 and 301), and in Minnesota state special education rules and statutes. The federal regulations, which have the force of law, explain how the law will be carried out.

Each state implements the federal laws somewhat differently, but all follow federal guidelines which define the purpose of special education, which is "to ensure that all children with disabilities have available to them a free appropriate public education that emphasizes special education and related services designed to meet their unique needs and prepare them for further education, employment,
and independent living.” — IDEA 601(d)(1). The law also requires that children are educated in the **Least Restrictive Environment (LRE)** which is further discussed below.

**A Guide to the IEP for Parents**
PACER has developed a guidebook that is designed for the parent, guardian, or surrogate parent of a child (ages 3 to 21 or graduation) with disabilities who receives special education services in a Minnesota public school or charter school. This publication can be found [here](#), or by visiting the PACER website - [www.pacer.org](http://www.pacer.org), then click on Resources - Publications - Special Education Rights. PACER is the Minnesota Parent Training and Information Center, funded by the U.S. Department of Education's Office of Special Education Programs.

**Least Restrictive Environment**
The least restrictive environment (LRE) for a child with disabilities is an educational setting that provides an appropriate program, including any necessary special supports, in as typical a school environment as possible. As much as is appropriate for the individual child, children with disabilities should attend the school they would typically go to if they did not have disabilities. They should have the opportunity to participate in extracurricular and nonacademic activities with children who do not have disabilities. These decisions are made by the IEP team based on the child’s needs. The IEP must explain why and how much time your child will be educated or participate in activities outside of the regular education setting. The explanation will include why the nature and severity of your child’s disability is such that he or she must be removed from general education to receive services. You must be invited to participate in all educational placement decisions for your child. If you are not able to attend a meeting when a placement decision is made, the school must use other methods, such as individual or conference telephone calls or video conferencing, to help you participate. The school must keep a record of how staff tried to help you be involved in making the decision. In addition, you must be informed about the placement alternatives that are available for your child. The IEP team will discuss these alternatives and together you will decide what is most appropriate to meet your child’s needs in the least restrictive environment. The services must be developed to fit your child, not the other way around. IDEA requires school districts to have a variety of placement settings, called federal settings, available to meet the individual needs of children.

**Service Coordination and Case Management, and difference between Part C and Part B.**
If your child is identified as needing special education, the terminology for the staff involved with, and the plan written for your child will vary depending on your child’s age:

<table>
<thead>
<tr>
<th></th>
<th>Part C: Children age 0-2 yrs 11 months</th>
<th>Part B: Children age 3-21</th>
</tr>
</thead>
<tbody>
<tr>
<td>Name of your child's plan</td>
<td>Individual Family Service Plan (IFSP)</td>
<td>Individual Education Plan (IEP)</td>
</tr>
<tr>
<td>Title and Duties of the person in charge of your child's plan</td>
<td>Service Coordinator</td>
<td>Case Manager</td>
</tr>
<tr>
<td>Age that plan ends</td>
<td>Age 3. Student must be evaluated and found eligible (if appropriate) prior to their 3rd birthday.</td>
<td>Plan ends when student graduates from high school. In some instances, the IEP team may retain a student and delay graduation until IEP goals have been met. A child ages out of special education July first of the year they turn 21.</td>
</tr>
</tbody>
</table>
Referral to Special Education

Birth to Kindergarten entry
The process to refer a child birth to Kindergarten entry can be done a variety of different ways. Anyone can refer a child, including a parent, family member, friend or professional who works with the child. There are three ways to refer a child who is not yet enrolled in Kindergarten:

1. Refer online: www.helpmegrowmn.org
2. Refer by phone at 1-866-693-GROW (4769)
3. Refer directly to the school by calling the local school district where the child lives.

If you are not the parent or guardian, you may make a referral without parent consent for children ages birth to five. However, we encourage you to speak with the family about this referral. The local Infant and Toddler Intervention or Preschool Special Education program will contact the family for their permission to proceed with the referral. Parents may accept or decline the referral. The parent’s contact information must be provided at the time of referral. This helps connect the child with the correct local school district

Kindergarten to Grade 12 process
Before a student can be referred for an evaluation the school must be able to document the efforts it has made to address and solve the presenting problems of the student. The school must be able to document a minimum of two research based interventions. Typically, the two interventions are put in place for three to four weeks in an attempt to solve problem(s) exhibited by the student. If the team determines that the student is not making appropriate progress following the interventions and believes the student may be a student with a disability, they may proceed with the evaluation referral.

If the pre-referral interventions are not successful in solving the problems and the school believes the child might qualify for special education services, the student is referred to the child study team. This team determines what areas need to be evaluated and who will be involved in the evaluation process. This results in a evaluation determination plan that is reviewed with the parents. Parents have to give their permission for the district to proceed with an evaluation if the student has never received special education support previously.

If the parent requests an evaluation to determine whether a child has a disability and needs special education, the school district must respond within 10 school days of the request. The response may include the proposal of interventions or an evaluation plan. If the district refuses to conduct the evaluation, it must give the parent appropriate notice and inform the parent of their rights. The parent must be asked to give permission, in writing, for an initial (first-time) evaluation. Once the parent agrees to the evaluation plan, the evaluation report and a discussion of the results must be completed within 30 school days.

Once a child is found eligible for special education services, an Individualized Education Program is written. This happens as the result of a team meeting. PACER Center-Champions for Children with Disabilities-offers a parent guide to the IEP process. This document can be found [here](#).
### Obtaining a County Social Worker

County human or social service departments connect people to agencies that provide programming that promotes independence, productivity, and community inclusion, such as, semi-independent living services, vocational services, and medical assistance. County social workers can also play a part in the transition planning process for students. They can assist in coordinating services and accessing funding for needed adult programming.

Depending on the type of disability your child has, the process for acquiring a social worker can begin at any age; however, it is encouraged to apply by age 14 when schools are beginning the transition process. If students have a developmental/intellectual disability, this process can begin during early childhood (birth on up). If and when a county social worker is acquired, inviting them to IEP meetings is highly encouraged to assist with programming.

To begin the process, one must contact an intake worker. Ask for an intake worker for either adult services, mental health, or developmental disabilities. In order to qualify for a Developmental Disabilities (DD) social worker, individuals must have an intellectual disability with an IQ score of 70 or below. Other impairments that may also qualify for services even when an IQ score is higher than 70 may include Fetal Alcohol Syndrome, Autism, or other developmental disabilities. Mental health social workers work with individuals with a medical mental health diagnosis obtained by a Psychiatrist, Ph.D. Psychologist, or Clinical Social Worker. Finally, some individuals with health impairments or other physical disabilities may qualify for adult services in the disability unit.

Applying for a county social worker can be done at no cost to the family. Students who are 18 or older and do not have a legal guardian can apply for a social worker without getting parental consent. Below is the contact information for the surrounding counties.

| School Based Mental Health | Human Development Center Carlton County: 40 Eleventh Street Cloquet, MN 55720 Phone: 218-879-4559 St. Louis County: | Human Development Center (HDC) works cooperatively with most school districts in our services area to provide therapy/counseling at school sites, and at HDC clinic locations. Referrals come from school personnel at each location. www.humandevelopmentcenter.org |
With funding support from the Minnesota Department of Human Services, Accend provides school-based mental health services in schools in the Lake Superior (ISD 381) and Cook County (ISD166) school districts. These services include Diagnostic Assessment, Clinical Consultation, Psychotherapy and CTSS Skills training, delivered on-site and in family homes.

www.accendservices.com

CTSS is designed to help children under the age of 18 with mental health, emotional and/or behavioral issues. This service is based on the unique and changing needs of the child and is designed to improve the child's functioning within the family and community. CTSS activities take place in the child’s home and the community or school and referrals for services come from County Social Services. CTSS is available in St. Louis and Carlton Counties.

A therapist recommends CTSS and directs these services.

**Advocacy**

**ARC Northland**: Provide services in the following area: self advocacy, housing access assistance, PCA and respite services, social groups (summer), classes, parental support and groups. Located downtown Duluth at 424 West Superior Street, Suite 500. (218) 726-4725 [www.arcnorthland.org](http://www.arcnorthland.org)

**Minnesota Disability Law Center**: Provides legal help for Minnesota residents with disabilities. All individuals with disabilities are eligible to receive help, regardless of age or income level. (612) 334-5970; (612) 332-4668 TDD. [www.mndlc.org](http://www.mndlc.org)

**PACER Center**: A parent training and information center for families of children and youth with all disabilities from birth through 21 years old. It expands opportunities and enhances the quality of life of children and young adults with disabilities and their families, based on the concept of parents helping parents. PACER provides individual assistance to families and offers more than 30 programs for parents and professionals. (952) 838-9000; (800) 537-2237 toll free. [www.PACER.org](http://www.PACER.org)

---

**Early Hearing Detection and Intervention**

The goal of the Early Hearing Detection and Intervention (EHDI) program is to promote communication from birth for all children through the early identification of hearing loss and the initiation of appropriate intervention services. Newborn hearing screening and follow-up plays a critical role in the EHDI process by identifying newborns who are at risk for hearing loss and connecting them with diagnostic, support, and intervention services. Without EHDI, infants with hearing loss may experience delays in many developmental areas including language, vocabulary, articulation, social interactions, and behavior. EHDI Protocol includes the 1-3-6 Hearing Screen Model: screen before 1 month of age, diagnose before 3 months of age, and intervention before 6 months of age.

Delay in hearing loss diagnosis can often be considered a neurodevelopmental emergency. The newborn period is a critical time for development and growth, and changes quickly. Studies have shown that when hearing loss is identified before three months of age and intervention is initiated at no later than six months of age, children perform as much as 20 to 40 percent higher on school-related measures than children with hearing loss that was not identified early. Many different healthcare professionals and entities play a role in the hearing screening and follow-up process. As required by law (Minnesota Statute 144.9661), hospitals and out-of-hospital birth providers are expected to screen all infants for hearing loss and report results to the family, primary care provider, and the Minnesota Department of Health (MDH).

Young children with permanent hearing loss are at risk for delays in many developmental areas including language and communication, social interaction and behavior, as well as literacy and later academic achievement. It is critical that children with permanent hearing loss and their families receive appropriate support services as soon as possible. The population of children who are deaf and hard of hearing has diverse and unique needs and requires individualization in order to help each child reach his/her full potential. Access to highly qualified service providers who have specialized knowledge and skills in early childhood development, supporting families, and the communication opportunities chosen by each family is critical. To provide the highest quality of intervention, more than one provider may be required.

Disability Specific Resources

Here are some disability specific resources:

**Autism Society of Minnesota:** [https://www.ausm.org/index.php](https://www.ausm.org/index.php)
The Autism Society of Minnesota is a non-profit organization committed to education, advocacy and support designed to enhance the lives of those affected by autism from birth to retirement.

**Down Syndrome Association of Minnesota:** [https://www.dsamn.org/](https://www.dsamn.org/)
The mission of the Down Syndrome Association of Minnesota is to empower individuals and families to create community and celebrate the abilities of people with Down Syndrome.

**Epilepsy Foundation of Minnesota:** [https://www.epilepsyfoundationmn.org/](https://www.epilepsyfoundationmn.org/)
The Epilepsy Foundation offers services across Minnesota and eastern North Dakota to those facing the challenges of epilepsy. They also serve the broader community by fostering a better understanding of epilepsy, promoting basic seizure training, and raising awareness of how common it is to experience a seizure.

**Minnesota Brain Injury Alliance:** [https://www.braininjurymn.org](https://www.braininjurymn.org)
Their mission is to raise awareness and enhance the quality of life for all people affected by brain injury.

**Muscular Dystrophy Association:** [https://www.mda.org/](https://www.mda.org/)
The Muscular Dystrophy Association is committed to saving and improving the lives of kids and adults living with muscular dystrophy.

Assistive Technology

**What is assistive technology?**
Assistive technology (AT) can be a device or service which will help a student gain independence in his or her school environment. AT devices can be low-tech, like a pencil grip or high tech, like a speech generating device. An AT service is a service that assists in the selection and use of a device. An AT service can range from an evaluation to training and technical assistance of the device.

**Considering a student for AT services? What does it mean to be considered for an AT device?**
Consideration is a short process and should not be confused with assessment. During the consideration phase, the IEP team members collect and discuss information regarding a student's strengths, abilities and skills. This is tied in with discussion regarding the student's environment, general education, curriculum needs for meeting the IEP goals and possible AT services and devices to achieve these goals.

**Who is involved in considering a student for AT?**
When considering the AT needs of a student, the team process is crucial. Each member of the IEP team brings his or her skills and knowledge to the group. Combining these skills and this knowledge creates a collaborative effort that benefits the student by choosing the best AT device or service for his or her needs.
Members of the IEP team may include:
The student, parent, special education teacher, regular education teacher, paraprofessional,
physical health disabilities teacher, teacher for the deaf/hard of hearing, teacher for the visually
impaired, speech language pathologist, psychologist, occupational therapist, physical therapist,
building administrator or special education administrator.

Once the IEP team has completed the consideration phase and has come to the conclusion that AT may
benefit a student, a formal assessment must be completed.

How does the IEP team complete an assistive technology assessment?

First the team does a thorough review of the **Student**, the **Environment**, the **Tasks** and the **Tools (SETT)**.

**Student**: What are the student’s current abilities? What are the needs of the student?

**Environment**: Where is help needed (classes, situations, etc.)? What is the physical arrangement of
room? What supports does the student currently have?

**Tasks**: What are the tasks the student needs to complete to meet IEP goals? How might the tasks be
modified to accommodate the student’s need?

**Tools**: What AT tools or services will help meet the task requirements? Would low-tech, mid-tech or high
tech work best for the student? What strategies might be used to increase student performance?

Examples of AT:

<table>
<thead>
<tr>
<th>Activities of Daily Living (ADLs)</th>
<th>adapted grips, non-slip materials, adapted utensils and cooking equipment, adapted devices for hygiene</th>
</tr>
</thead>
<tbody>

</tr>
<tr>
<td>Mobility/Seating &amp; Positioning</td>
<td>grab bars, non-slip surfaces, walkers, manual or powered wheelchairs, adapted bikes, mobile standers</td>
</tr>
</tbody>
</table>
Should assistive technology be described in a student’s Individual Education Plan?

Yes! In order to assure that a device is utilized to its fullest potential, and that all members of the IEP team are in agreement about the hows, whens and wheres of using the device, it is critical that the device is described in detail in the student’s IEP.

How is assistive technology written into the Individual Education Plan?

Assistive technology can be documented anywhere within the IEP, however there are three places where AT most often appears: in the annual goals and short-term objectives; in the list of supplementary aids and services necessary to maintain the student in the least-restrictive environment; and in the statement of related services necessary for the student to benefit from his or her special education program. Some IEP programs also have a special section for AT.

Who makes sure the AT device really gets used?

The IEP team is responsible for making sure that the student, school staff, family members and other interested parties are knowledgeable about how an AT device works. For instance, if a student has a communication device, it is important that the school staff as well as family members at home know how to operate the device with the student. This may require ongoing training or instruction.

Payment for assistive technology

According to policies of the U.S. Department of Education’s Office of Special Education Programs (OSEP) schools must provide AT services and products necessary for a student to receive a free, appropriate public education (FAPE). These services and products should be described in the student’s IEP in one of four ways: as special education, a related service, a supplementary aid or a service accommodation to testing.

For more AT resources, including pdf downloads for the SETT process, visit the NLSEC website: http://www.nlsec.org and click on Resources - Assistive Technology Resources.
